

Blue Coral Spa

There are two aspects to a great massage. First, the massage experience should be an event in itself, a period of wonderful sensual indulgence that creates a feeling of deep satisfaction and contentment. Second is the longer-term therapeutic benefit; relief from stress and aching muscles, stimulation of the body's internal systems and a general sense of well-being and relaxation. At our Blue Coral Spa our highly trained therapists employ time-proven techniques including traditional massage systems, hot herbal compresses and therapeutic essential oils to fine tune physical and emotional health. Book an appointment, and give yourself over to an hour or two of unmitigated, blissful contentment.

Blue Coral Massage

Inspired by the scent of tropical blossoms and the gentle rhythms of the Hua Hin sea, this full body treatment employs a combination of massage and aromatherapy to help release somatic stress and create a feeling of lasting relaxation.

Herbal Heat Compress

Our herbal heat compress is based on an ancient treatment and can be enjoyed as a stand-alone therapy or in conjunction with other massage treatments. The compress soothes aches and eases tension from within muscles, leaving you feeling wonderfully relaxed and revitalized.

Thai Massage

Thai Massage uses a combination of special techniques that unlock tension and stimulate the body's natural healing systems. It employs a very active approach, and is quite unlike other massage forms. Our skilled therapists are expert at using their hands, elbows and knees to stretch joints, tease away stress, and manipulate your body's energy lines.

Stress Relief Foot Massage

Your feet suffer more punishment than any other part of your body but we have a treatment designed to help keep your feet in tip-top condition. Treatment begins with an aromatic soak and exfoliating massage. Over time, the massage promotes improved circulation and decreases tension, easing away pain and fatigue. The treatment concludes with a warm herbal steam towel.

Manicure

Nails are clipped and shaped; a scrub exfoliates dry skin; cuticles are softened by soaking in a bath of essential oil; manicuring treats the nails; a firm hand massage with lotion is applied and can be topped off with your favorite nail color. Indulge.

Pedicure

Why let your hands have the attention? Toe nails are clipped and shaped; a scrub exfoliates dry skin; cuticles are softened by soaking in a bath of essential oils; the toe nails are cleansed and tended to carefully; a firm foot massage with lotion follows and ends with your favorite nail color. Voila!
